

AutoBlend Systems Resin Blending Systems

Advantages

- Blend formulation is accurate and repeatable.
- Sealless diaphragm pumpheads eliminate fugitive emissions and product contamination.
- Formulations can be changed by simply changing metering pump stroke length.
- The 'building-block' design of all Bran+Luebbe systems not only saves space, but allows for future retrofits.
- Once a system has been calibrated, no further intervention is required.
- Product changeover can be controlled automatically.

Simplified process diagram

Bran+Luebbe Solution

- A multiple-head metering pump to accurately proportion all ingredients.
- We work with you to design and build a system that meets your specific needs.
- Use automatic stroke adjustment and variable speed drive for completely automated systems.
- All Bran+Luebbe skids are piped, assembled, and tested prior to shipment to minimize start-up time.

Why should you be interested?

- You need to improve product consistency between product runs.
- Savings result from producing only the required volume.
- Our streamlined engineering and assembly services minimize project costs.
- Blend flexibility to meet different needs.
- Standard packaging of Bran+Luebbe equipment keeps costs down.
